

Special plant construction/machinery construction for the food/ Pharmaceutical/heat treatment industry, . . .

We break new ground for you in special machine construction

FTS special technical solutions GmbH, based in Cuxhaven, lives up to its name – because when it comes to special technical solutions at a high level, you are well advised to place an order with us. Whether plant construction, mechanical engineering, metal construction or the construction of individual conveyor systems:

Our portfolio is as diverse as the diverse needs of our clients. We offer you tailor-made solutions for process automation in your company and thus optimize the potential efficiently, constantly and sustainably

Good reasons for special machine construction from FTS

Our workshop is in Cuxhaven, but we are there for you on site for the planning and discussion and later, of course, for the assembly and commissioning! And that not only applies to our services in the field of special machine construction, but of course also when it comes to our sophisticated transport systems or welding work.

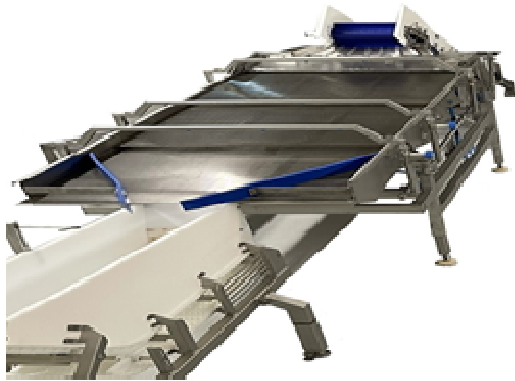

After-sales service guaranteed!

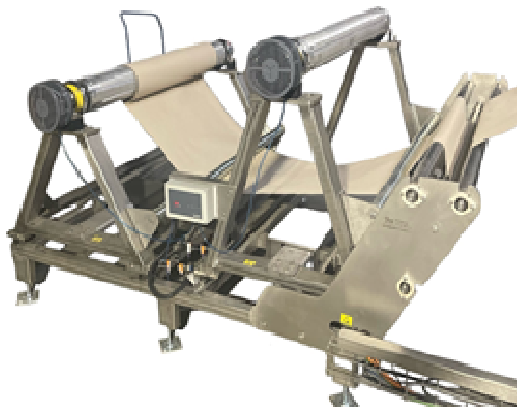

Your partner for special technical solution

Food industry ... we are there for you!

In the food sector, we manufacture according to the standards of hygienic design, i.e. the cleaning-friendly design of parts, components and production systems.

You will always find a contact person in us. Even if the line has been running for a long time, we are there for you! Regardless of whether maintenance, repairs or adjustments are pending:

Call us on ☎ 04721 / 5906719 or use our contact form on the website:
